

# SMART VIDEO SOLUTIONS

BEYOND SECURITY

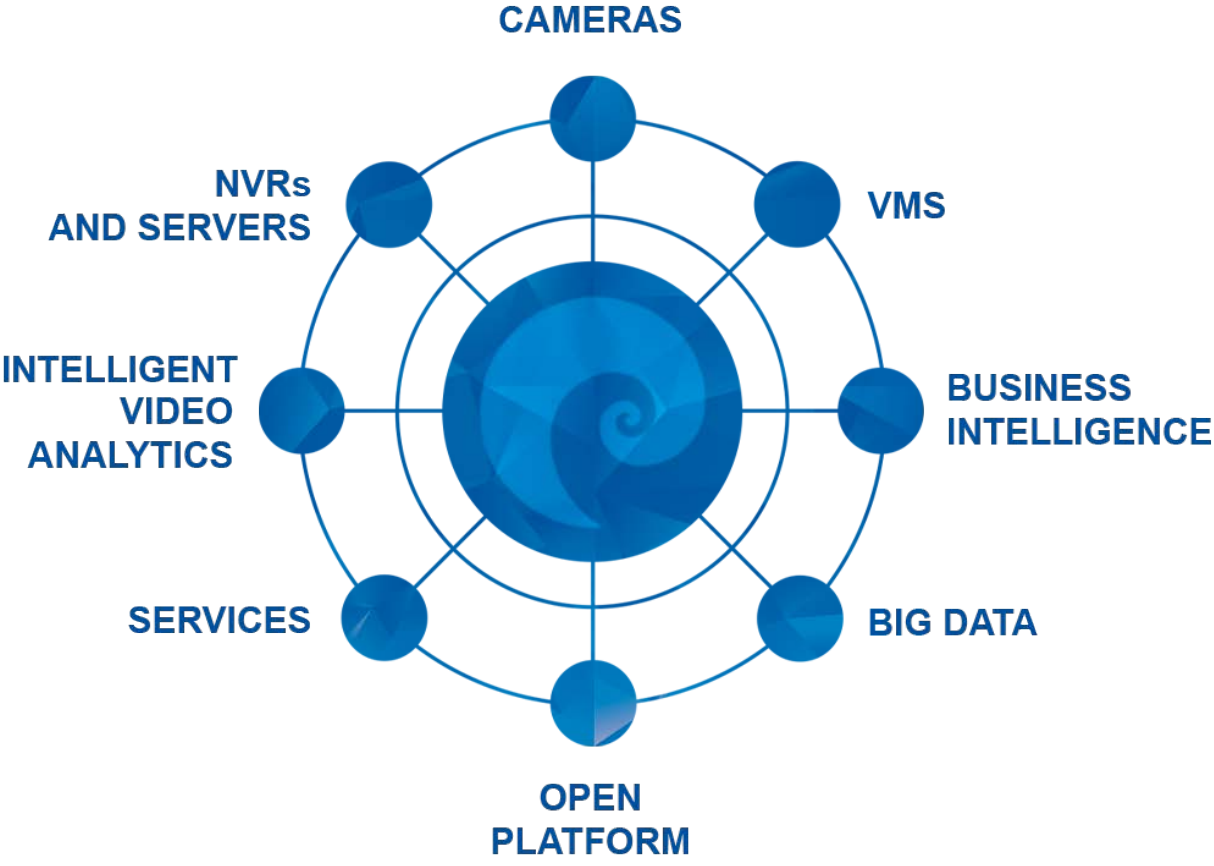

# VISION SUITE

## A tailor-made solution

The VISION SUITE is the result of more than 25 years of continuous work, which has evolved thanks to the particular needs and requirements of our clients.

It is a complete solution for video surveillance that includes: cameras, recording servers, IVA (Intelligent Video Analysis) software, VMS (Video Management Systems) platform, as well as Business Intelligence (BI) and Big Data modules, which complement our offer with a wide range of services that we can adapt to the needs of each user.

The VISION SUITE is an open platform with the latest in Artificial Intelligence and Big Data management, which makes it the ideal solution for organizations that need to manage multiple locations, with hundreds, and even thousands of surveillance cameras, in an agile way, simple and safe.

## Video technology beyond security

**Complete CCTV  
solution**

**Open, flexible  
and scalable**

**Customizable**

**Robust, stable  
and safe**

**Quick return  
on investment**

**Business operational  
intelligence**

With the VISION SUITE and our catalog of services, SCATI guarantees a double commitment: one, the evolution of its technology complying with the interoperability market standards (ONVIF), focusing on the cybersecurity of its systems and providing users with the possibility of incorporating new developments gradually and transparently into daily operations; and two, support in all phases of the project, from project design to assisted operation and after-sales technical support.

# CAMERAS SCATI EYE

## Covering every need

Our cameras that incorporate various intelligent analytics capable of performing facial recognition, temperature measurements, counting people, managing capacity, reading license plates, etc. with the aim of generating events or alerts immediately in order to verify the situation that caused it.

Beyond security, our SCATI EYE cameras generate and send metadata with information extracted from the implemented analytics, which, through its management using Big Data and Business Intelligence tools such as SCATI RECKON, provide very valuable management indicators so that your company can develop comprehensive dashboards for decision making.

# RECORDERS SCATI VISION

## High performance, high reliability

Based on IP technology and within the VISION SUITE, these devices are powerful recording systems capable of recording and managing up to 512 cameras simultaneously on a single server.

All SCATI VISION recorders work with the H.265 compression format, ideal for optimizing the storage and transmission of images over the network, allowing configurable storage with discs specifically manufactured for use in video surveillance.

Image management can be done locally, either directly through the recorder's SCATI VISION software itself or through the SCATI TOUCH application on a touch monitor. It is also possible to remotely manage the recorders and images through the SUITE VISION VMS.

# ▶ SCATI VMS

## The VMS adapted to your security management

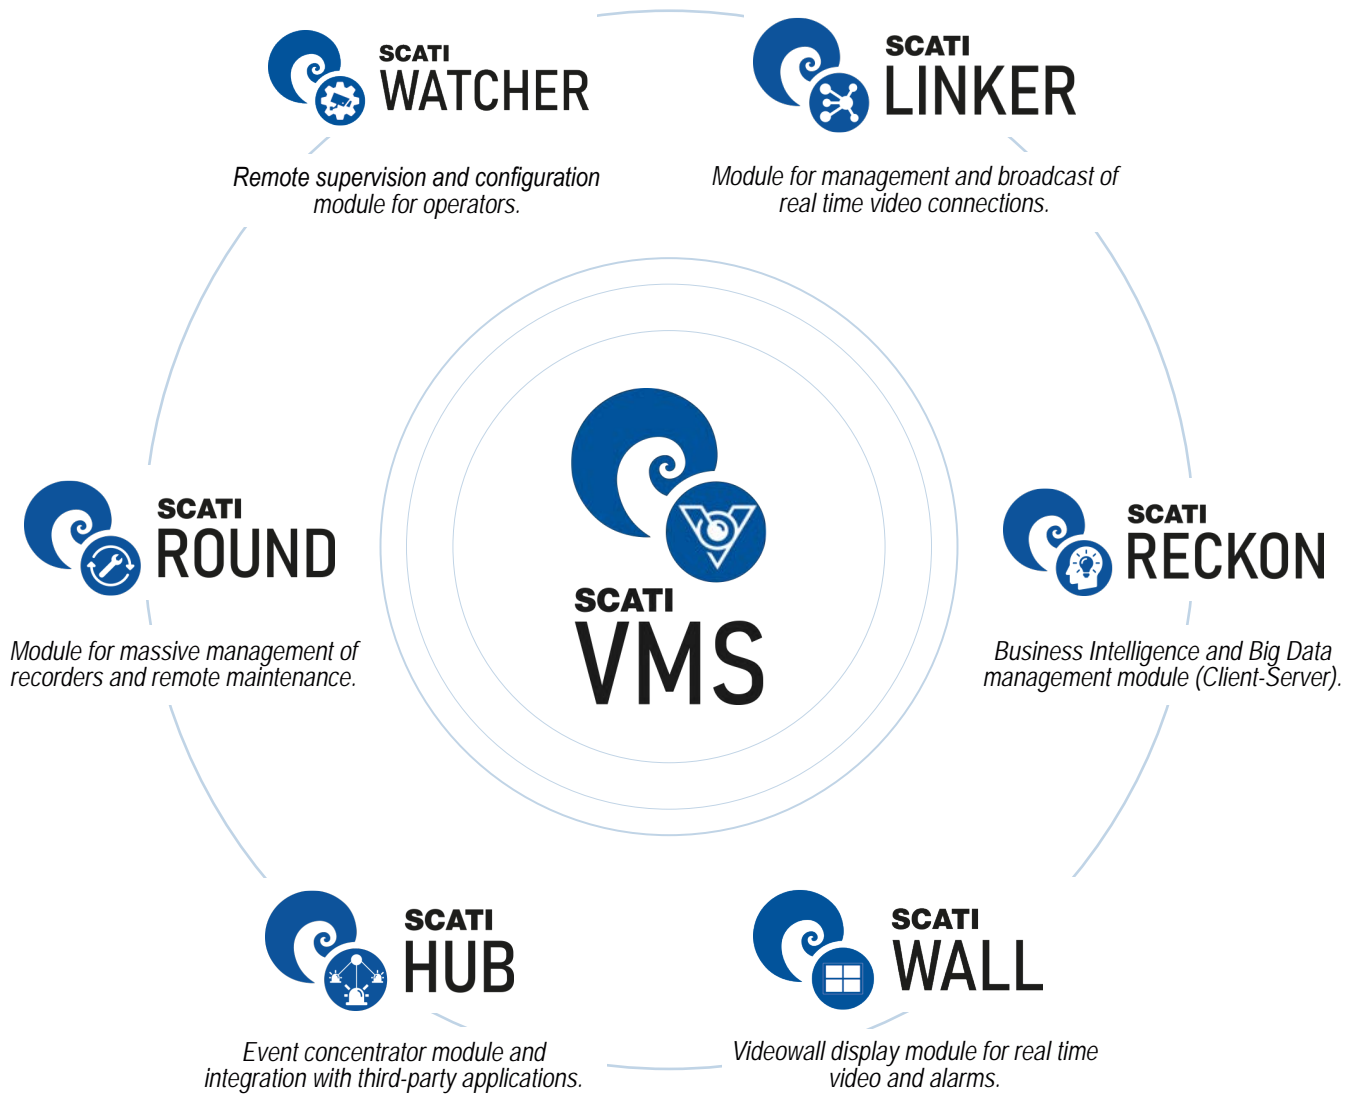

SCATI VMS is a powerful software for the remote and centralized administration of the video surveillance system. Its multiple functionalities cover all the needs of a professional security operator. With this tool you will be able to improve coordination between teams, make it easier to obtain forensic evidence and reduce operating costs associated with the security area. Work smarter and with less effort.

Thanks to the different customizable software modules that make up the SCATI VMS, organizations can obtain that tailored suit they so desire.

All these modules have configurable functionalities and offer a large number of features by default already in their base version, and yet in SCATI's consulting work the user transmits their most specific needs to us and that is when we are able to develop that suit to suit measure adapting each module to the operation of each client.

## Highly scalable centralized operation

The evolution of the systems in the organizations themselves must take into account factors such as their growth, change management and scenarios with high degrees of uncertainty.

The modularity of SCATI VMS allows the solution to grow gradually, taking into account the needs of the users at all times and the operation that best suits those needs. In this way, it will allow them to advance in a much more flexible and scalable way, also providing a notable improvement in security levels since through this modular architecture, different types of access can be managed for each of the modules that make up SCATI VMS.

# SCATI RECKON

## Your Business Intelligence platform

The basic objective of Business Intelligence (BI) is to continuously support organizations to improve their competitiveness, providing the necessary information for better decision-making as it is based on evidence and concrete data.

SCATI RECKON allows the creation of dashboards by adding information from our video surveillance systems and enables the integration of data from third-party systems with the images recorded on our SCATI VISION recording servers.

VISION SUITE's own dashboards allow you to manage information on: the status of the systems, facial recognition analytics, license plate reading, barcode/QR code reading, specific queue/capacity management analytics and waiting times, people counting, heat maps or temperature measurement using thermographic cameras, etc.

## Special modules

**Goods traceability  
in industrial and logistics environments**

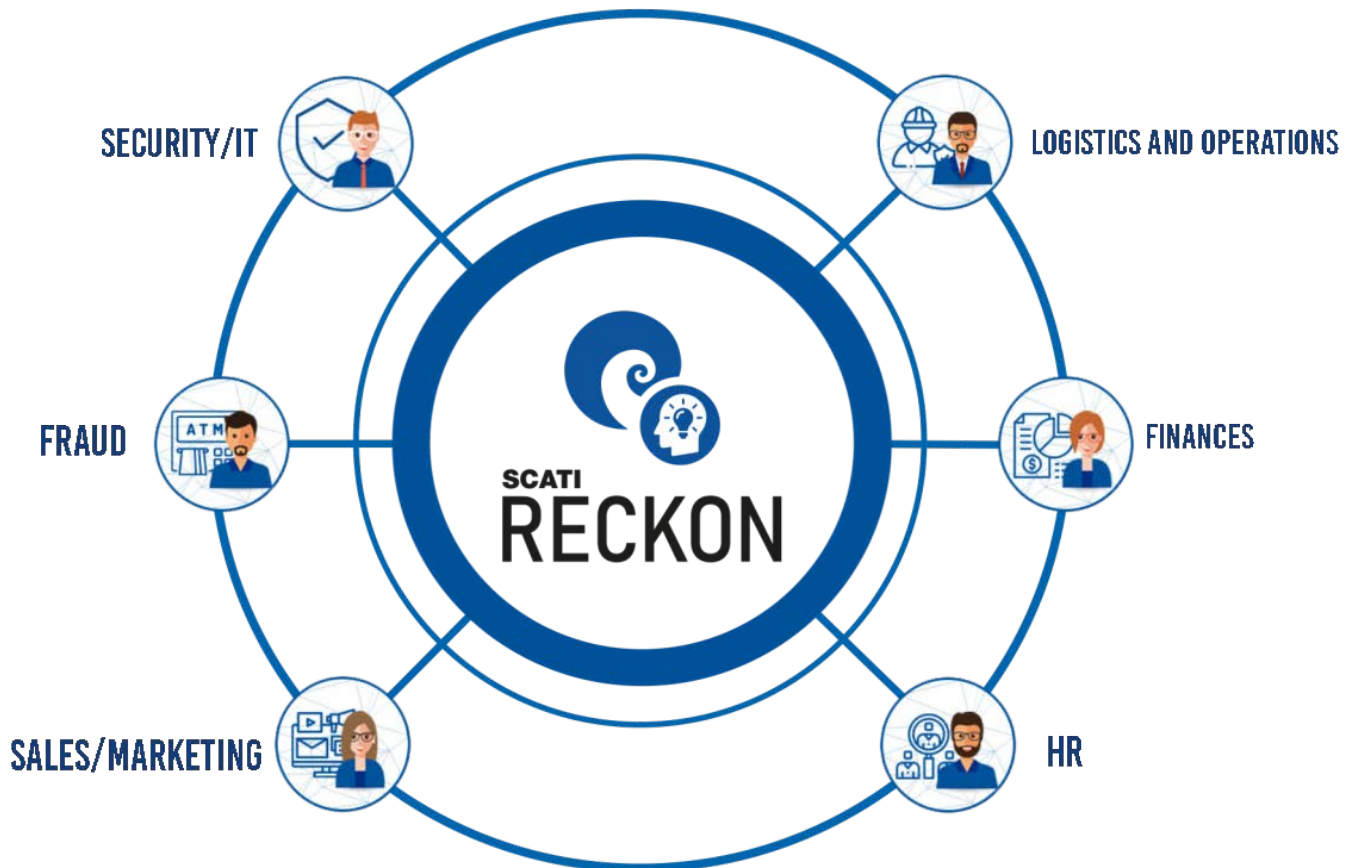

**Monitoring and visual control  
of mobile assets**

**Operations supervision  
at ATMs and POS**

## A competitive advantage for the entire organization

Discover how video technology, in combination with this powerful BI tool, allows you to guarantee security, streamline processes, optimize your resources, reduce response times and maximize the profitability of your facilities, having a greater perspective of the organization, favoring greater control of it.

More and more organizations are seeing the need to invest in data analytics solutions for a simple reason: information is power and the automation of information processing is greater productivity. By having precise tools for these functions, we will obtain tangible and beneficial results for the entire organization, generating competitive advantages from which they can benefit to boost their growth.

# SCATI MOBILE PRO

## Video management in vehicle fleets

SCATI MOBILE PRO is a solution for on-board environments that offers the necessary tools to face the challenges of modern mobility, improving operations and efficiency, managing to create safe environments for your fleet of vehicles.

The essence of what it represents is already reflected in its name: MOBILE, as it is a mobility solution for vehicle fleets, and PRO, because it is intended for those organizations that require professional management of these systems.

### CAMERAS

With different formats and adapted for installation inside the vehicle or outside, SCATI MOBILE PRO line has various camera options so that you can choose the one that best suits the characteristics of each project.

### MOBILE NVRs (MNVRs)

Within our portfolio, we have different options and configurations of the MNVRs, with a recording capacity of up to 16 cameras, different storage dimensions, direct connection of the cameras to the PoE ports that are incorporated, and the possibility of having GPS communications modules. and 4G.

### VMS SCATI FENIX MOBILE

In the control center, where the power of the platform really lies, the SCATI FENIX MOBILE VMS provides operators with all the necessary tools for advanced management of on-board and mobility systems.

# SERVICES SCATI CARE

## Supporting our clients all along the way

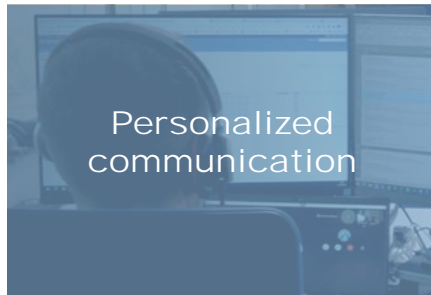

Our goal is for our clients to obtain the maximum performance from our technological solutions and to ensure their peace of mind.

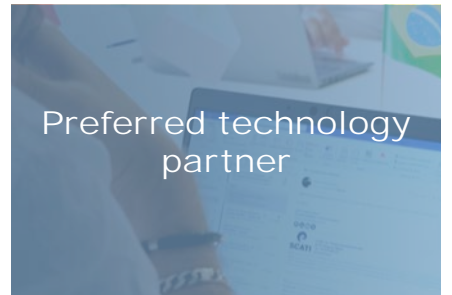

We support our clients throughout the project cycle, paying attention to those details that make the difference and making the widest possible variety of services available to them, so that each user can choose the ones that best suit their budget and operational needs.

Quality maintenance

Personalized communication

Preferred technology partner

Consulting in each phase of the project

Training and certifications on our platform

Customized software developments

Commissioning

Preventive and corrective maintenance plans

On-site staff or support from factory

YOU IMAGINE, WE CREATE

SCATI is a manufacturer of smart video systems specialized in creating solutions adapted to your needs. We are a 100% Spanish-owned company, which develops its own software for the management of cameras, alarms, metadata and integrations.

Based on trust and proximity, we provide the latest technology to solve your real, present and future problems, with the highest levels of cybersecurity.

We have more than 25 years of innovative experience, adapting our solutions to your security and business needs.

---

With Headquarters in Spain, SCATI has subsidiaries in Mexico and Brazil, and also has a wide Network of Certified Partners that offer services locally, with the same levels of quality and commitment that characterize the company.
