SMART SECURITY SOLUTIONS

YOU IMAGINE, WE CREATE

SCATI

MADE IN EU

NDAA COMPLIANT

SCATI

As a result of our own innovation and development work for more than 25 years, SCATI offers you a complete solution that provides your organization with much more than just security management.

Whether with our Systems Integration Platform, where from a single solution you can manage your different security and automation subsystems, or with our complete Suites for Video Surveillance and Access Control, our technology incorporates the latest in Artificial Intelligence and Big Data management so that users get the most out of their systems, always complying with the highest IT and cybersecurity standards.

Simplify your daily operations, provide your operators with intelligent tools that allow them to be more productive and get the most out of your systems with SCATI, to go beyond security.

VISION SUITE

A tailor-made solution

The VISION SUITE is the result of more than 25 years of continuous work, evolving thanks to the particular needs and requirements of our customers. An open and integrable platform equipped with the latest in Artificial Intelligence following the strictest standards of the IT and cybersecurity world.

It is a complete solution for intelligent video surveillance that includes all the elements, systems and software you may need. A wide range of IP cameras with built-in AI, different recording server options, a VMS (Video Management System) software that allows advanced management of the platform, as well as Business Intelligence (BI) and Big Data software modules or AI server analytics that complement and elevate our proposal to a higher level.

Bet safely on the ideal solution for organizations that need to manage the security of multiple locations, with hundreds, and even thousands of surveillance cameras, in an agile, simple and reliable way.

- ✓ **Complete video surveillance solution**
- ✓ **Open, flexible and scalable**
- ✓ **Customizable**
- ✓ **Quick return on investment**
- ✓ **Operational Business Intelligence**

SCATI EYE Cameras

Covering every need

No matter what the target, our SCATI EYE cameras always offer you excellent image quality thanks to their multiple designs and features, adapting to any environment even in the most adverse conditions. In compliance with ONVIF standards, we have a wide range of options to meet the specific needs of each environment.

☑ **Built-in AI**
☑ **4K resolution**
☑ **Thermal**
☑ **Domo PTZ**
☑ **Panoramical**
☑ **ATEX**

ONVIF®

ThermalScan Cameras

ThermalScan cameras act as a thermal scanner that detects, recognizes and tracks an unlimited number of targets (people, vehicles, etc.) automatically, over long distances and in the most adverse weather conditions and in total darkness. They are ideal for the protection of very large areas, both on land and at sea, as they replace hundreds of conventional cameras and simplify system installation and maintenance.

Detection ranges:

	Drone
750m	
	Person
375m 1000m	
	Vehicle
750m 2000m	
	Ship
4000m	

● **Mini Series**
● **Periscope Series**

When the ThermalScan detects a target, a SCATIEYE PTZ dome automatically positions itself to display the video in visible spectrum for identification while WATCHER and SENTRY receive alarms for situational awareness.

SCATI VISION Recording servers

A recorder for every need and organization

Experience the peace of mind of having guaranteed recording with SCATI VISION. Our recording servers help you maximize the availability of your video surveillance system and get the most out of it, lowering installation and maintenance costs through simple, user-friendly operation. Designed with organizations that demand high standards of cybersecurity in mind, SCATI VISION recording servers are a guaranteed choice.

MINI SERIES
· Up to 4 cameras
· 12V power supply

PRO SERIES
· Up to 32 cameras
· Integrated Switch PoE

ENTERPRISE SERIES
· Up to 64 cameras
· Manageable Switch PoE

KRAKEN SERIES
· Up to 256 cameras
· Hardware redundancy

SCATI VMS

Complete platform

SCATI VMS is a powerful software for remote and centralized management of the video surveillance system. Its multiple functionalities cover all the needs of a professional security operator. With this tool you can improve coordination between teams, facilitate the collection of forensic evidence and reduce operating costs associated with the security area. Work smarter and with less effort.

SCATI WATCHER
Remote monitoring
and configuration for operators.

SCATI RECKON
Exploitation of Business Intelligence and
management of Big Data associated with video.

SCATI ROUND
Massive management of recorders
and remote maintenance.

SCATI VMS

SCATI LINKER
Management and redistribution
of video connections in real time.

SCATI HUB
Event concentrator and integration
with third party applications.

SCATI WALL
Real-time Videowall display
of alarms.

SCATI ANALYTICS

Video analytics on server

Whether you want to complement the analytics capabilities of SCATI EYE cameras or have a legacy of unintelligent cameras, SCATI ANALYTICS brings the full power of artificial intelligence to server-based video analytics. Boost your security, gain deeper insight into your operations and improve your organization's productivity with our server-based video analytics.

AI APPLIED TO VIDEO ANALYSIS

Barcode/QR reading	Abandoned object	Object classification	Line crossing	Wandering	Crowds	Object color	Motion detection
Stolen object	Trespassing	Falls	Optical Character Recognition (OCR)	Directional alarm	People running	Tampering	People counting

SCATI CLOUD

The evolution of video surveillance to the cloud

SCATI CLOUD is an innovative solution that gives users a new approach to address their video surveillance needs. SCATI's new cloud-based VMS allows to easily scale the efficient centralization of recordings, facilitating real-time monitoring from anywhere and from any device, fixed or mobile.

Up to 8MP

Remote control

SCATI MOBILE

Video management in vehicle fleets

SCATI MOBILE is a solution for onboard environments that provides the necessary tools to meet the challenges of modern mobility, improving operations and efficiency, creating safe environments for your fleet of vehicles. View real-time images of your fleet, receive alarms based on their location and know where your vehicles are at all times.

Vehicular NVRs

BUSINESS INTELLIGENCE
SCATI RECKON

Turn data into decisions

The basic objective of Business Intelligence (BI) is to continuously support organizations to improve their competitiveness, providing the necessary information for better decision making based on evidence and concrete data.

SCATI RECKON allows the creation of dashboards through the aggregation of information from our video surveillance systems and video analytics, as well as enabling the integration of data from third-party systems with images from our SCATI VISION recording servers.

All areas of your business will be able to take advantage of RECKON for their decision making:

- Security/IT
- Operations Logistics
- HR
- Fraude
- Comercial Marketing
- Financial

Special Modules

SCATI PARCEL — Traceability of goods in industrial and logistics environments

**SCATI TRACKER** — Visual monitoring and control of mobile assets

SCATI CASH — Supervision of operations at ATMs and POS terminals

ACCESS CONTROL
ACCESS SUITE

The peace of mind of being in control

Developed in-house, our ACCESS SUITE is a solution specially designed to increase the efficiency of your security operations.

Designed under open standards, composed of an ecosystem of hardware devices and coupled with a software management platform, our SUITE ACCESS offers its users a solid, reliable and scalable solution to protect their facilities with maximum guarantees.

A robust access control solution based on advanced technologies that reduce the chances of identity theft and ensure that only authorized persons can access those areas allowed.

You no longer need to compromise on security, flexibility or technology when it comes to access control. The ACCESS SUITE offers you the complete solution you need to secure your building and manage access efficiently.

Main functions of the ACCESS Suite

An access control system is an investment that, done the right way, offers numerous benefits. It is an essential tool for modern security, offering not only enhanced protection, but also more efficient and adaptable management of access to your premises.
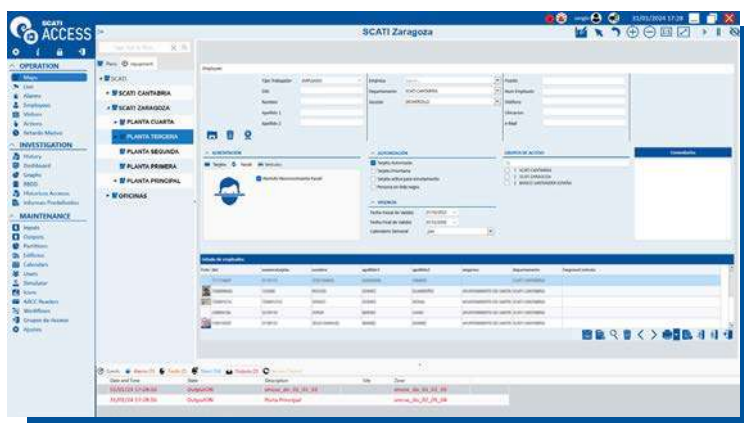

Authorization ▸ Authentication ▸ Access ▸ Administration ▸ Auditing

SCATI ACCESS

Advanced management with operational flexibility

We understand that every building is unique and that access control needs vary. SCATI ACCESS access management software is designed to enhance the protection, efficiency and peace of mind of security managers. With cutting-edge technology, adaptive flexibility and state-of-the-art security measures, our software platform redefines the way you control access to spaces.

With different versions depending on the size of your facility and the operations you perform, SCATI ACCESS guarantees an uncompromising level of protection. It features high-level data encryption and multi-factor authentication, so you can be sure that only authorized people access your spaces.

SCATI ACCESS LITE
Small instalations

SCATI ACCESS PRO
Medium and large instalations

SCATI ACCESS CORPORATE
Large corporations

SCATI ACCESS GO
Mobile devices

Controllers and readers

Controllers are the backbone and the key to adaptive security and seamless management of your spaces.

Simplify management of multiple access points and ensure operability because our master controllers store permission and user databases locally, without the need for connection to the main server.

From high security proximity readers to biometric solutions, our state-of-the-art readers adapt to all your needs.

Don't compromise on security or flexibility. With our readers, you can rest assured that you have total control in your hands, no matter which access technology you prefer.

SYSTEMS INTEGRATION
SUITE SENTRY

Efficiency and safety, intelligently integrated

The SENTRY SUITE is a systems integration platform, aimed at providing our customers with a comprehensive solution through which they can manage in a simple, efficient and unified way all the information coming from their different security and automation subsystems.

SCATI SENTRY is a Systems Integration platform is a centralized solution that combines several security elements, such as alarm and intrusion systems, access control devices and video surveillance, also allowing the incorporation of automation and intelligent building control systems.

SENTRY supports the integration of multiple subsystems from different manufacturers, either through protocols based on market standards or through specific integrations developed ad hoc. In turn, it supports protocols associated with the industrial sector such as Modbus or Bacnet, as well as others related to the IoT world (MQTT, CoAP).

This integrated management allows the creation of action plans for possible incidents, management of the building's planimetry and integration with Google Maps and Google Street View, with HTTPS (TLS) secure communications.

CCTV	Alarms and intrusion	Building Management System	IoT Systems
Access control	Fire detection	Intercom	Workflows

SCATI SENTRY

The ultimate software platform for integrated management

Each user, sector or installation is unique. SCATI SENTRY adapts to each specific need, providing a customized solution. This not only improves security, but also contributes to a safer and more comfortable experience for building occupants.SENTRY makes use of data analytics and advanced algorithms to detect suspicious behavior patterns and critical events in real time.

Set up automatic responses to specific events, such as triggering alarms or blocking areas, for immediate action.
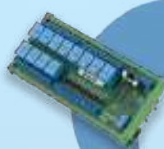

Provides effective tools for incident management, including tasking, tracking and reporting.

Generates detailed reports to assess system efficiency, comply with regulatory requirements and optimize internal procedures.

Thanks to the usability and user-friendliness of our solutions, you can guarantee easy configuration and start-up, avoiding interoperability and scalability problems in the future.

Automation devices

SDIO-12 (E/S)

Input/output devices and physical controllers play an essential role in system integration, enabling integration software to connect to and control the physical world.

By collecting real-time data, enabling precise control, detecting events and improving efficiency, these devices provide an invaluable set of benefits.

SMC-SENTRY (CONTROLLER)

Controllers, on the other hand, increase reliability, availability and local processing capacity, ensuring optimal performance in a variety of applications.

Together, these components enhance the ability of system integration solutions to create more secure, efficient and adaptive environments.

SCATI
